

Global Airbnb Business Performance Dashboard

New Listings

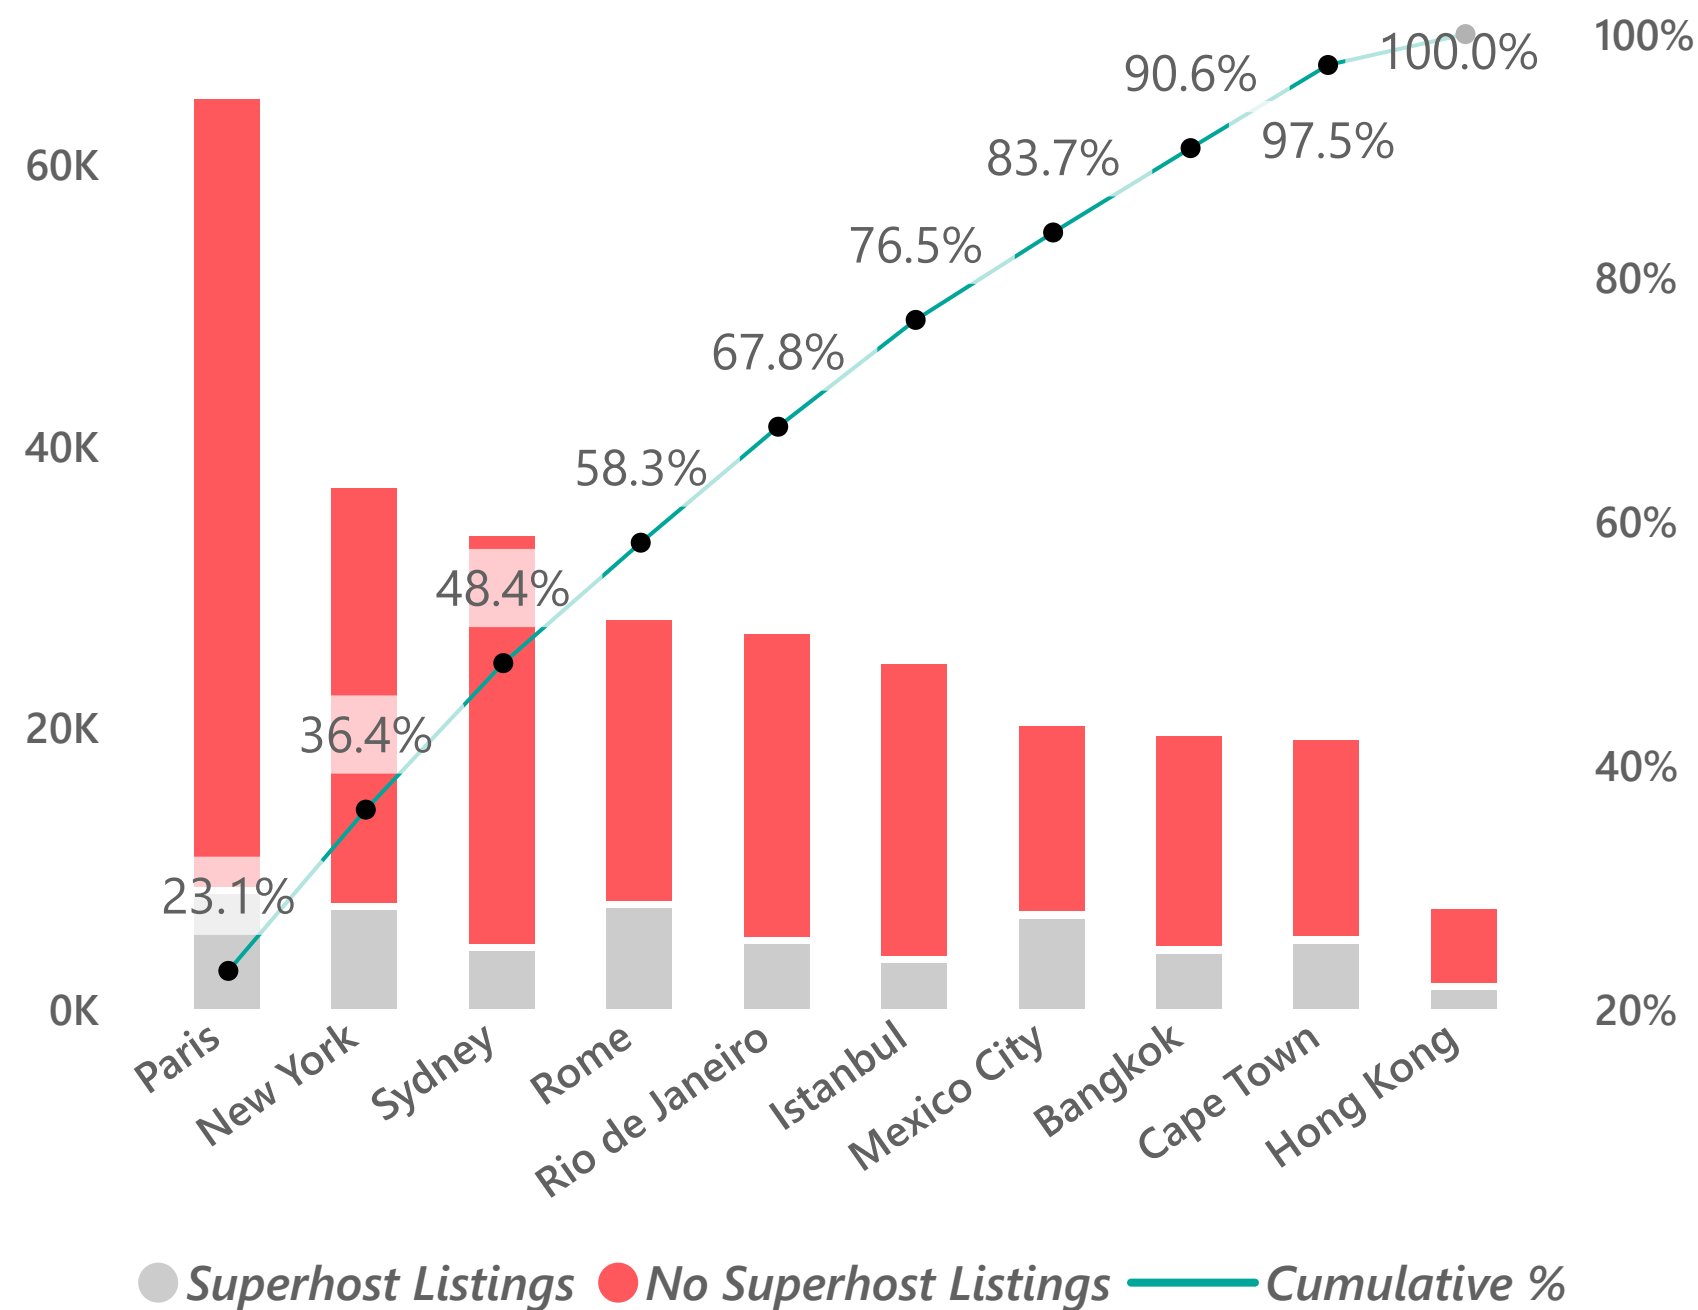

In 2015, Airbnb had the highest number of new listings. In 2016 and 2017, growth slowed because of stricter local regulations. Airbnb became profitable in the second half of 2016, and 2017 was its first full year of making a profit. From 2018, Airbnb started growing again, but this growth was affected in 2019 by the COVID-19 pandemic.

Global Airbnb Business Performance Dashboard

Market Share By City

Paris has the highest number of listings, followed by New York and Sydney, while Hong Kong has the lowest listing volume.

Paris has the highest number of listings, while hotel rooms have the highest average price at \$800, which may indicate a significant price difference compared with other accommodation types.

Overall Rating

Detailed Rating

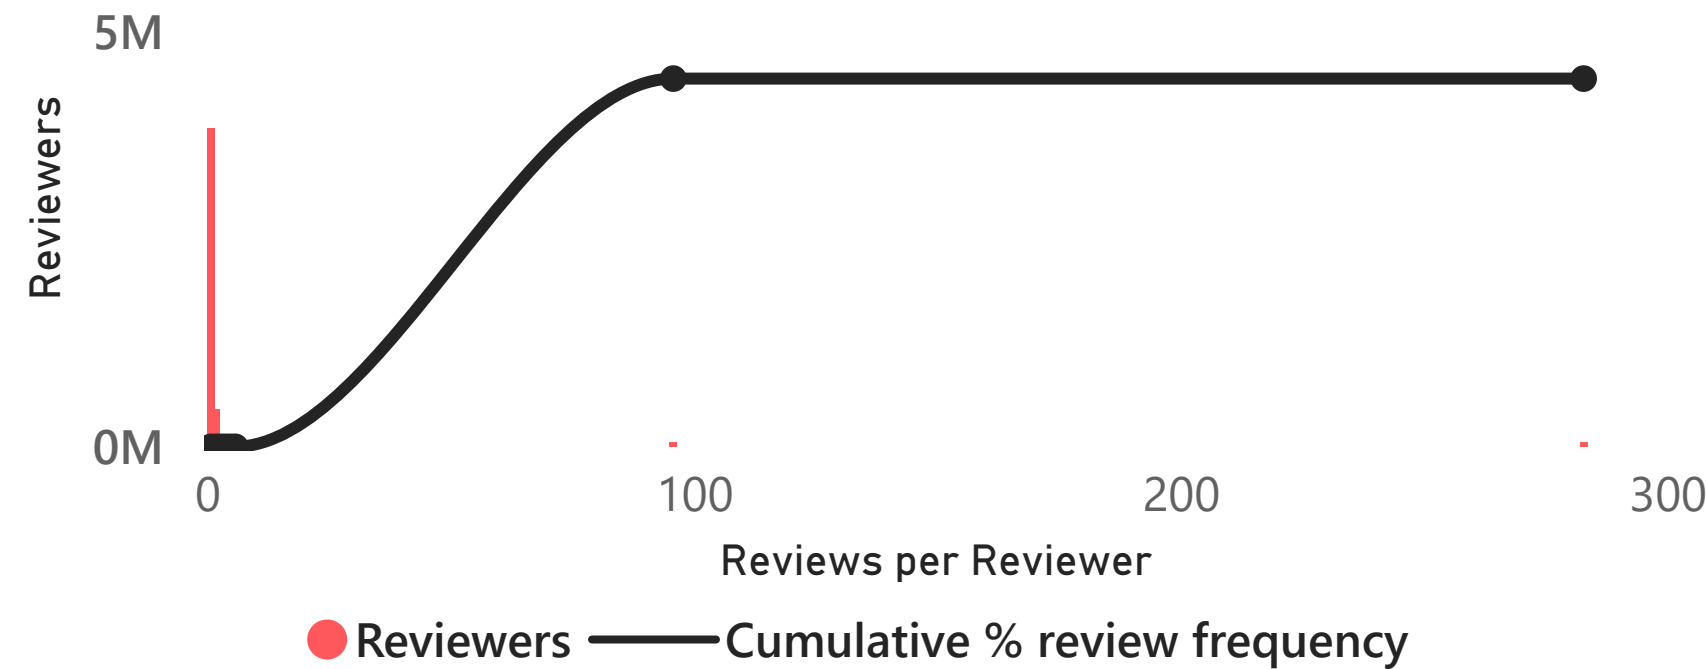

Mexico City has the highest overall rating, while Hong Kong has the lowest.

Global Airbnb Business Performance Dashboard

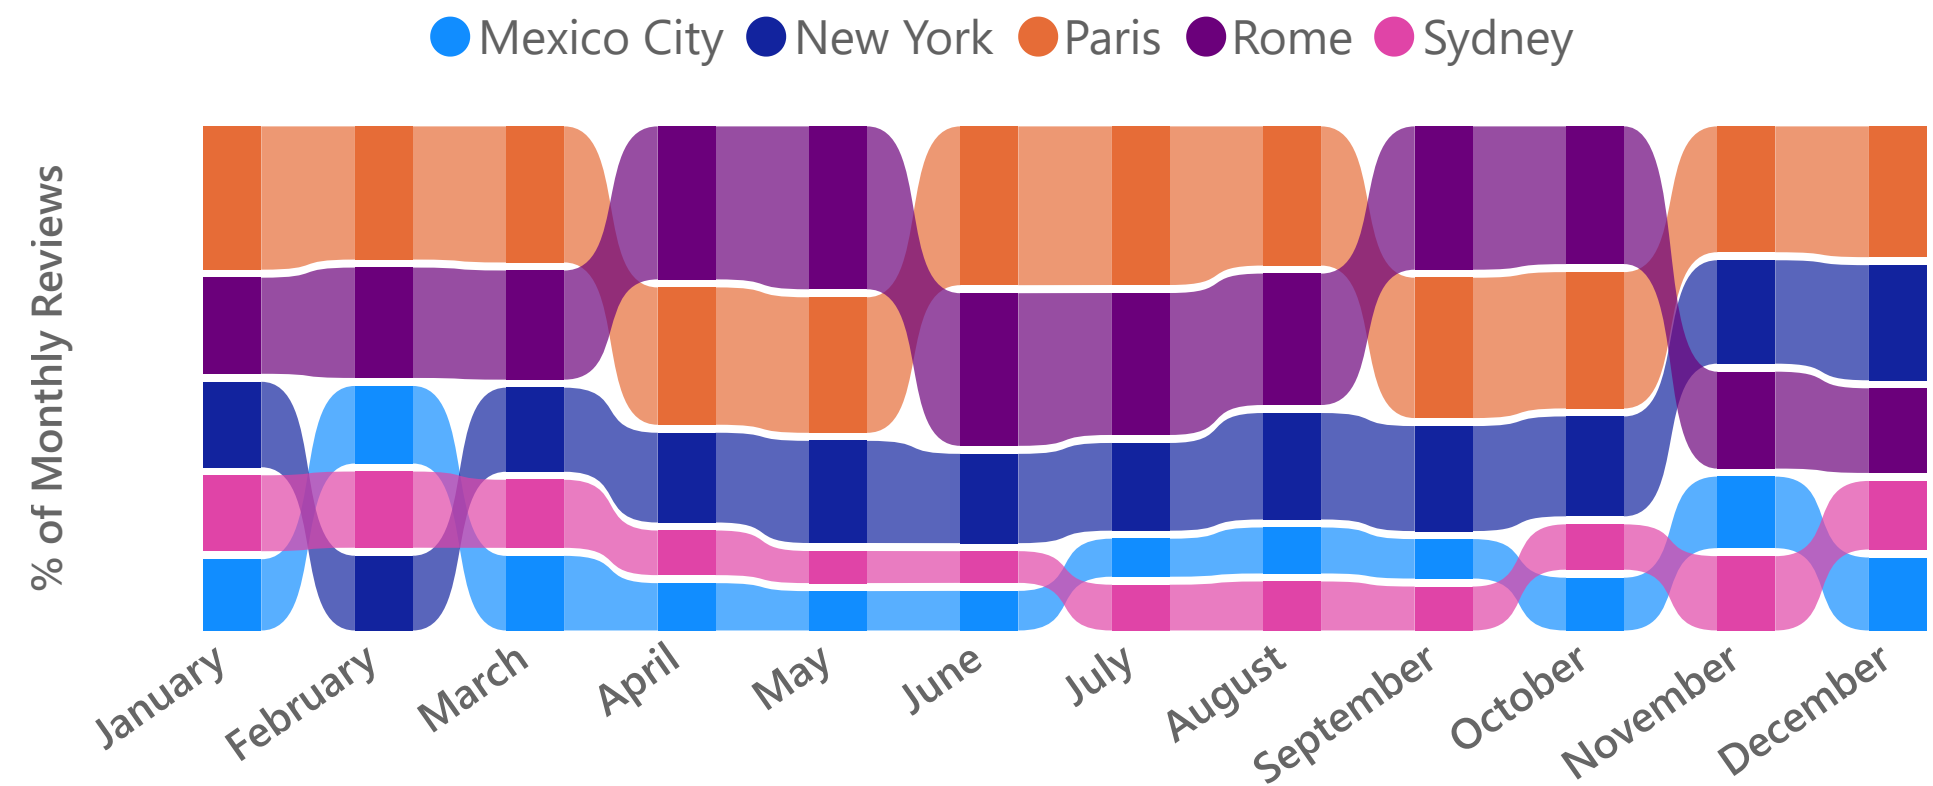

Review Frequency

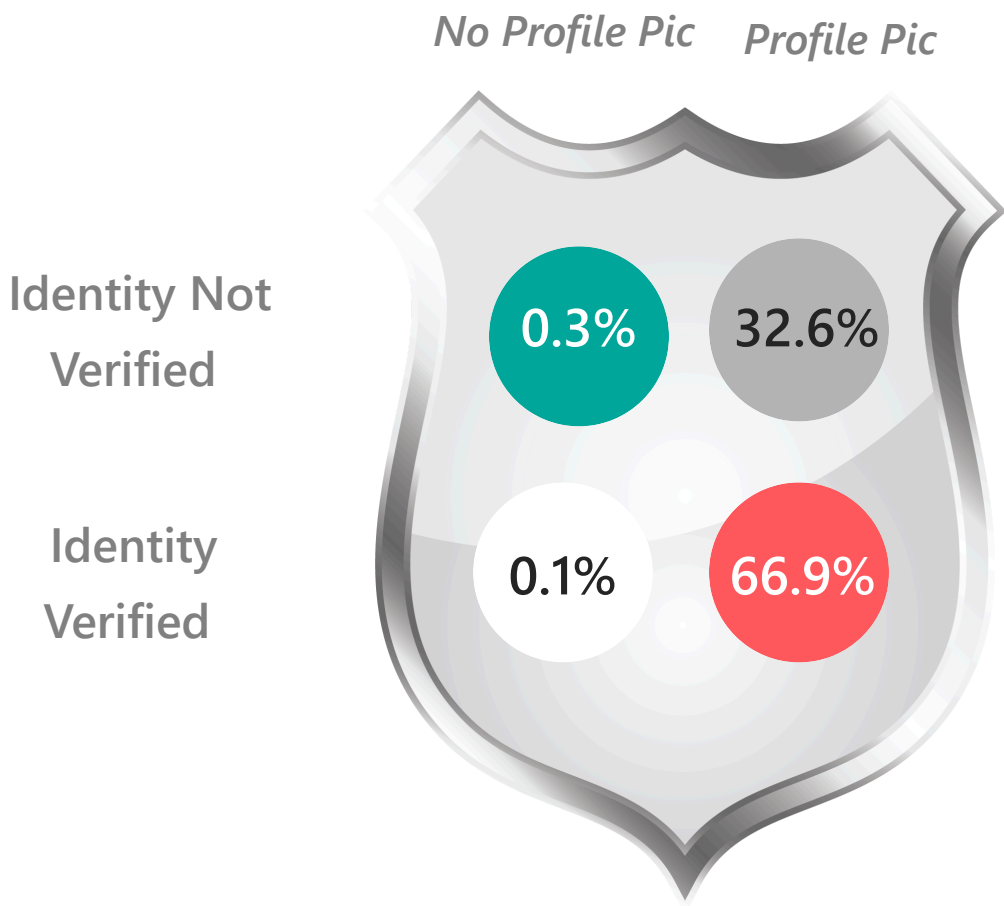

The vast majority of reviewers post only a few reviews before activity levels off, with extreme power users reaching up to **283** reviews. Most overall review volume is driven by users writing under **100** reviews.

Seasonality

Paris and Rome dominate review market share, shifting top positions dynamically between Q1, Q2/Q3, and Q4. **New York** maintains consistent steady volume through mid-year, while **Sydney and Mexico City** peak in winter and early spring.

Trust

Two-thirds of users (66.9%) achieve maximum trust by having both a verified identity and a profile picture. Almost all users upload a profile picture (99.5%), but 32.6% still require identity verification.
